To whom it may concern,

RE: LETTER OF RECOMMENDATION for MR MARK SOUTER

I have had the opportunity to work with Mark over a number of years, initially as a colleague and then as his client.

Mark demonstrated great strengths during the period that we worked together, including being a team player, solution oriented and driven to succeed in any given task. He was self motivated to take on and learn new tasks that were presented to him.

Mark was asked to fill many rolls and they included setting up, running and troubleshooting our telecoms and IT infrastructure for a rapidly growing company. Mark also trained and succeeded at becoming a 3D designer. Mark took this on and ultimately taught himself, on the job, how to design using various design programs. As a creative person, Mark was able to use this skill to greatly enhance our offerings.

As a client of Mark Souter, I have had the opportunity to see his design work steadily improve to a high level and have always enjoyed our interaction as he is very accommodating & professional solution provider.

Mark has proven over the years that he is very adaptable to change and varying environments, and with a very pleasant nature and a great sense of humour, I highly recommend Mark.

Yours sincerely

Andrew Stewart
